## Leadership Program for Emerging African Women in Science

Advancing a One Health Approach for Improved Health Outcomes

This program has supported me and served as a catalyst for my career advancement by providing mentorship, networking, skill development, exposure, and access to resources

Oreoluwa Kehinde is a veterinarian whose role is focused on providing comprehensive medical care, treatment, and support to animals, with the aim of ensuring their health and overall well-being. With her background in public health and interest in One Health, she is exploring the interconnections between animal health, human health, and the environment.

With work at the unique intersection of veterinary medicine and public health, Oreoluwa joined the AWARD Leadership Program for Emerging African Women in Science with the goal of acquiring skills that could empower her to thrive as a leader and researcher. She also sought to hone her leadership and team management skills, hoping to gain the knowledge needed to effectively lead teams and navigate intricate challenges.

Following her participation in the program, Oreoluwa says, "This program has supported me and served as a catalyst for my career advancement by providing mentorship, networking, skill development, exposure, and access to resources."

**Oreoluwa Kehinde**
